Understanding the Data Returned

Note it takes roughly an hour per minute of processing data but this is fluid due to the Frames per second of the source file.

Also its 1 video after the other, the method above is priority given... whereas the public Requesting is non-priority, also they do not have access for private files (everything is public)

On the final video page, all the data is available, also downloadable.

Description

Description

The "missing witness" from the Biden corruption investigation, Israeli professor Dr. Gal Luft, has laid out his bribery allegations against the president's family in an extraordinary video filmed in an undisclosed location while he's on the run.

In the 14-minute recording, obtained exclusively by The Post, the fugitive former Israeli army officer claims he was arrested in Cyprus to stop him from testifying to the House Oversight Committee that the Biden family received payments from individuals with alleged ties to Chinese military intelligence and that they had an FBI mole who shared classified information with their benefactors from the China-controlled energy company CEFC.

The self-proclaimed fall guy says he provided the incriminating evidence to six officials from the FBI and the Department of Justice in a secret meeting in Brussels in March 2019 — but alleges that it was covered up.

"I, who volunteered to inform the US government about a potential security breach and about compromising information about a man vying to be the next president, am now being hunted by the very same people who I informed — and may have to live on the run for the rest of my life on the run ..."

"I'm not a Republican. I'm not a Democrat. I have no political motive or agenda ... I did it out of deep concern that if the Bidens were to come to power, the country would be facing the same traumatic Russia collusion scandal — only this time with China. Sadly, because of the DOJ's cover-up, this is exactly what happened ..."
